# Corrective Solutions

A collection of intense facial therapies individually tailored to make an intense and corrective impact on YOUR skin

## CLINICAL SKIN CLEAR

FROM \$95

This system works non-invasively using combined Radio and High Frequency technologies that are attracted to the fluids in age spots, cherry angiomas, spider veins and skin tags and dries them out. This nifty treatment treats only your lesion and not the healthy skin surrounding tissue, so your treatment involves minimal discomfort and few side effects.

## SKIN NEEDLING PLUMP & REJUVENATE

\$299

Using skin needling, this powerful treatment restores the skin's youthful appearance by creating a controlled wound response in the deeper layers of the skin. This process quickly rejuvenates skin, increasing production of collagen and elastin. Skin needling is accompanied by a resurfacing peel and LED Light Therapy, making this a powerful treatment combination.
